
StockFox

Personalized AI Stock Research & Advisory for retail investors.

Problem Statement

High-effort & upskilling requirement for research interpretation causes decision paralysis, blind-trust, decision delay scenarios for retail investors - who are forced to choose b/w:

Black Box Tips — **Complex Tools** — **Fragmented Journey**

RESULT

Blind bets or frozen/delayed decisions

78%

Used multiple tools causing data fragmentation

40%

Weren't confident in their analysis conclusions

45%

Experienced decision paralysis from conflicting signals

63%

Abandoned research due to time constraints

45.4%

Lacked validation causing decision paralysis

User Research | Raw + Mind Map

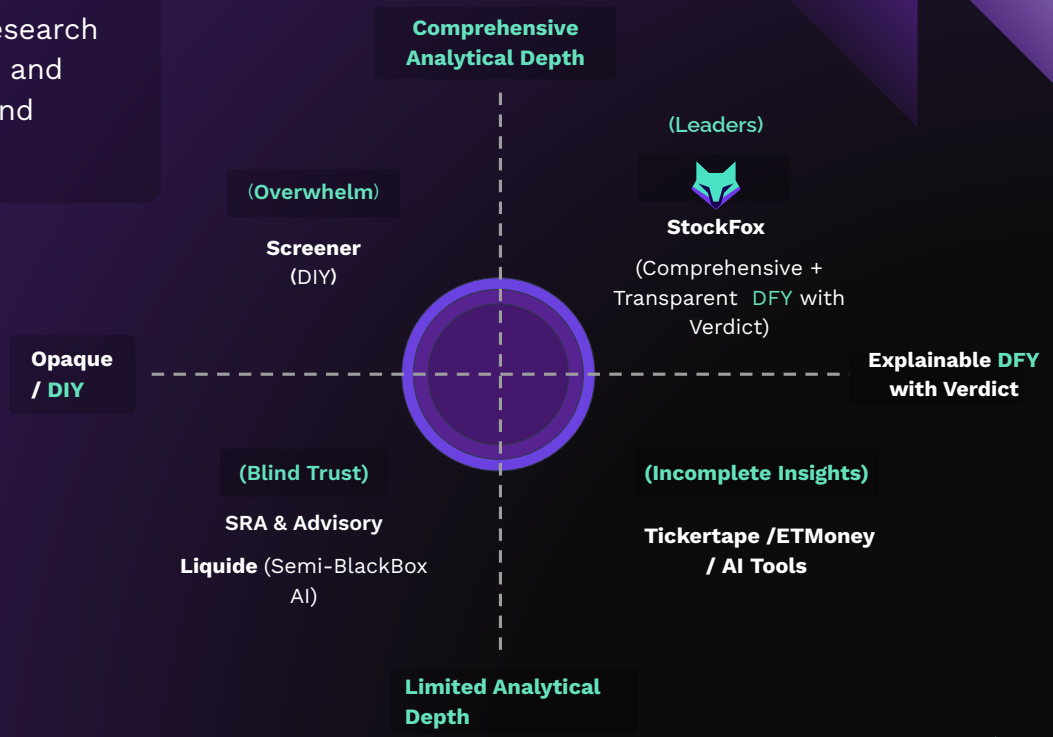
Our Solution

StockFox uniquely combines institutional-grade research coverage with personalized Done-For-You analysis and actionable verdicts, solving for time-to-decision and confidence gaps.

Context: Every tool today forces retail investors to pick between:

- **Blind trust**
- **Overwhelming DIY**
- **Incomplete DFY insights**

Research: Competitive Landscape Heat Map



The White Space: Why StockFox Wins

Building the Confidence Engine → The Only Complete Solution

Not another screener. Not another advisory. Not another AI tool. We're building the "Confidence Engine" - the complete platform that makes institutional-grade investing accessible to retail.

Comprehensiveness

Institutional-grade research: 200+ parameters, all 11 segments 7-10 analyst hours → 3 seconds

Transparency

Every insight cited and sourced: Trust through verification, not blind faith like others.

Personalization

Same stock, different verdicts for different goals. Others give generic scores. We align to thesis, risk, time horizon & more parameters than others to give truly hyper-personalised analysis & advisory, instantly.

Automation

Automation that guides analysis TAT, comparison, and validation - instantly available vs weeks effort

Education

Learn via practice: We build capability vs black-box tips by enabling contextual learning.

Why Now? India's Retail Investment Boom

Macro trends create a massive opportunity as India's retail investment ecosystem explodes with growth and regulatory support.

200M

Demat Accounts

5x growth since 2019 (**SEBI 2025**)

40M

New Investors

First-time investors (**SEBI 2025**)

$100B+

Fintech Ecosystem

Projected 3x growth over 10 years (**BCG 2024**)

29.5%

WealthTech CAGR

Explosive category growth (**KPMG India**)

Gen AI shift

From opaque tips - explainable, bias-free and instant research

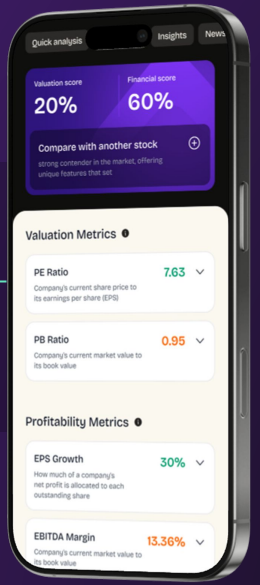
SEBI Push

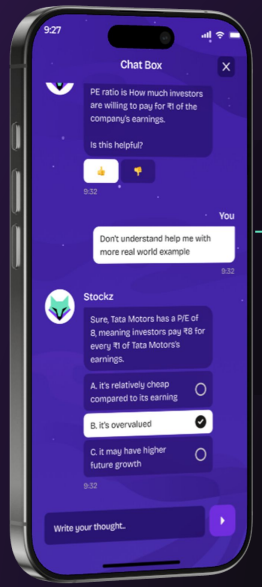
For awareness & transparency

The Solution Deep-dive: Scorecard & AI Assistant

01- Stock Scorecard with Clear Insights

Instant, evidence-based decision insights presented in digestible, transparent formats that explain the "why" behind every signal.





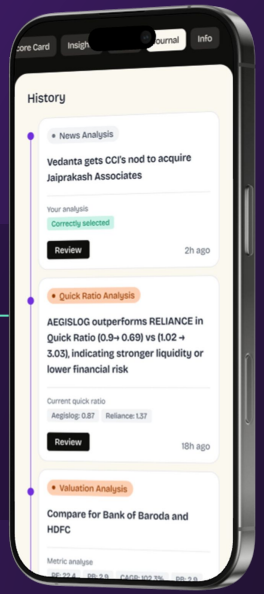
02- AI Assistant

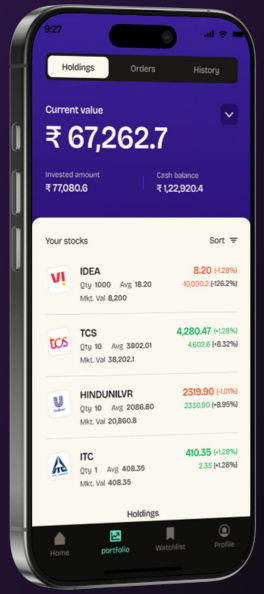
Chat interface for verified signals covering news, earnings, metrics, and more—cutting through noise with credible, contextualized information.

The Solution Deep-dive: Analysis Journal & Simulator

03- Analysis Journal

Automatically logs your analytical journey, enabling reflection on past decisions and continuous improvement of investment strategy.





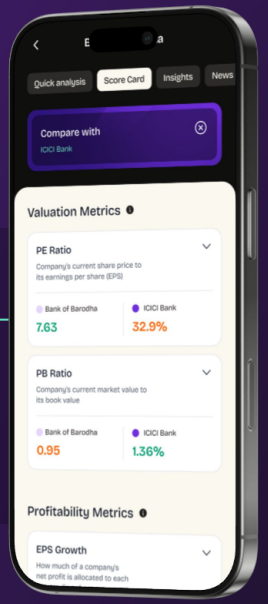
04- Forward-Testing Simulator

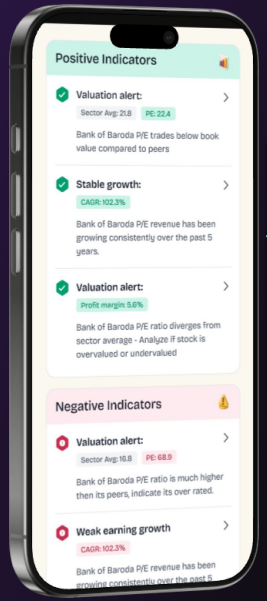
Test analysis decisions with virtual money in real market scenarios before committing actual capital—learn by doing without risk.

The Solution Deep-dive: Stock Comparison & Guided Analysis

05- Stock MTM Comparison

Real-time competitor comparison





06- Guided Research

Analyze stocks with expert-curated metrics

Early Traction Validates Product-Market Fit

Strong early signals demonstrate that retail investors are hungry for a confidence-driven research platform—and willing to pay for it.

6k+

Community Engagement

Plan 2026: Complete Investment Confidence

Our 2026 roadmap extends beyond research to create the most comprehensive investor confidence platform in the market.

1. Decision Signals Across 200+ Metrics
2. Hyper-Personalized, Goal-Based Signals
3. SRA Advisory Marketplace
4. Portfolio Analysis & Recommendations
5. Vernacular Support
6. One-Click Transaction Execution

Business **Roadmap**

From analytics to Full-Stack Investing

Phase 1 (2026)

Foundation + Human Layer

Goal: Trusted Analytics Platform

- AI Stock Scorecards & Screeners
- Real-time News Integration
- Personalised User Journey
- Human Advisory via SRA's

Phase 2 (2027-2028)

Build Up & Transaction Layers

Goal: Added human advisory & transaction layers

- Stronger Analytical Engine
- Broking & MF Distribution

Phase 3 (2028-2030)

Scale-Up

Goal: Evolve to a full-stack investment ecosystem across multiple investment ecosystems.

People Pay for Stock Analysis Tools

Market Validation: Paid Subscriptions Are Mainstream

From India to global markets, investors consistently pay **₹200–₹1,999**/month for clarity, confidence, and time saved. Even in the AI era, subscription research remains a validated business model—and top accelerators continue funding this space.

Tool	Region	Indicative Pricing	Market Validation
Tickertape Pro	India	~₹2,399/yr (₹200/mo)	Large retail base; multi-tier paid plans
Trendlyne	India	~₹310–₹1,500/mo	Multiple consumer tiers publicly marketed
Screener Premium	India	~₹4,999/yr	Premium + AI answer credits monetized
StockEdge Premium	India	~₹1,999/mo	Premium features + gated communities
TradingView	Global	~₹3,995/mo	Massive paid user base; multi-tier model
Seeking Alpha	Global	~$299/yr	Longstanding subscription research leader
Simply Wall St	Global	Premium/Unlimited tiers	Widely adopted consumer subscription
Gaus (YC S25)	US	AI investment analyst	Y Combinator-backed—category confidence

This established willingness to pay, combined with India's exploding retail investor base, creates a massive monetization opportunity for a product that genuinely delivers confidence.

Market Opportunity - Analytics & Advisory

TAM: 100M Users

Entering market by 2030

SAM: 35M Users

30-35% with analytical mindset

SOM: 1M Users

3% OF SAM

Target Revenue by 2030: **₹200** Crores at ₹**2,000** per user with **1M** paying customers
